Hogs and Pigs

National
Agricultural
Statistics
Service

United States
Department of
Agriculture

Washington, D.C.

Released June 30, 1992, by the Agricultural Statistics Board. Estimates refer to June 1 and March-May 1992.

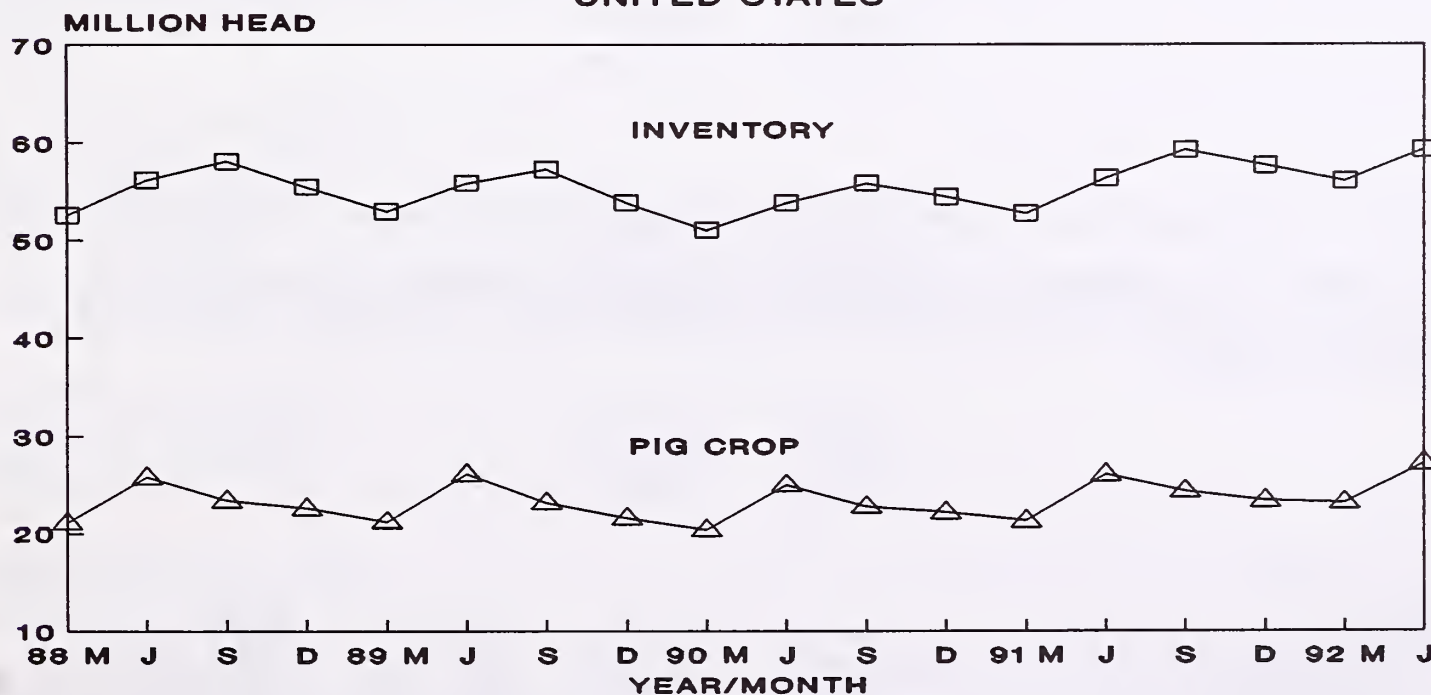

U.S. Hog Inventory Up 5 Percent

U.S. inventory of all hogs and pigs on June 1, 1992, was 59.3 million head. This was 5 percent above last year and 10 percent above June 1, 1990.

Breeding inventory, at 7.60 million head, was 1 percent above last year and 7 percent above two years ago. Market hog inventory, at 51.7 million head, was 6 percent above a year ago and 10 percent above June 1, 1990.

The December 1991-May 1992 U.S. pig crop was 50.4 million head, 6 percent more than last year and 11 percent above the same period two years ago. Sows farrowing during the six month period totaled 6.26 million, up 4 percent from last year and 9 percent above the same period in 1990. Pigs saved per litter was 8.05, a new record high for the period, compared with 7.92 last year and 7.89 two years ago. The March-May U.S. pig crop was 27.2 million head, 4 percent above a year earlier.

JUNE 1 INVENTORY & PIG CROP UNITED STATES

An index is located at the end of the report. For information, call Hubert Hamer (202) 720-3106. Office hours are 8:00 a.m. to 4:30 p.m. ET.

U.S. hog producers intend to have 6.18 million sows farrow during the June-November period, a 2 percent increase from the actual sows farrowed during the same period in 1991 and 8 percent above two years ago. Farrowings for June-August are expected to be up 1 percent from last year and September-November farrowings are expected to be 3 percent above a year earlier.

16 State Inventory Increases 6 Percent

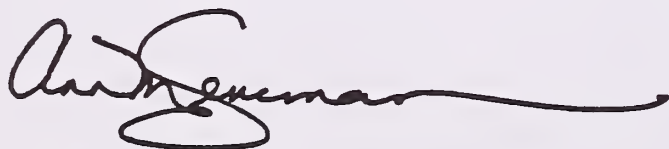

Inventory on hand June 1 in the 16 quarterly States totaled 54.1 million head, up 6 percent from last year and 10 percent above June 1, 1990. The 16 states accounted for about 91 percent of the total U.S. hog and pig inventory.

The December-May pig crop in the 16 States was 45.9 million head, 6 percent above last year and up 11 percent from 1990. The March-May pig crop totaled 24.8 million head, 4 percent higher than the past year and up 9 percent from two years ago.

Farrowing intentions in the 16 quarterly States for June-November are 5.64 million head, up 2 percent from the same period last year and 9 percent above two years ago. June-August intended farrowings, at 2.86 million head are up 1 percent from the comparable quarter in 1991. September-November intended farrowings, at 2.79 million head, are 3 percent above last year.

* This report contains revised estimates for the March 1, 1992, *
* inventory and December-February 1992 pig crop. *

This report was approved on June 30, 1992, by the Acting Secretary of Agriculture and the National Agricultural Statistics Service's Agricultural Statistics Board.

Acting Secretary of
Agriculture
Ann Veneman

Agricultural Statistics Board
Chairperson
Rich Allen

2/ Intentions.

3/ Individual State estimates not available for 34 States.

Reliability of June 1 Hogs and Pigs Estimates

Survey Procedures: A random sample of U.S. producers was surveyed to provide data for these estimates. Survey procedures ensured that all hog and pig producers, regardless of size, had a chance to be included in the survey. Large producers were sampled more heavily than small operations. Data were collected from about 94,412 operators during the first half of June by mail, telephone, and face-to-face personal interviews. Regardless of when operators responded, they were asked to report inventories as of June 1.

Estimation Procedures: These hogs and pigs estimates were prepared by the Agricultural Statistics Board after reviewing recommendations and analysis submitted by each State office. National and State survey data were reviewed for reasonableness with each other and with estimates from past years using a balance sheet. The balance sheet begins with the previous inventory estimate, adds to it estimates of births and imports, and subtracts estimates of slaughter, exports, and deaths. This indicated ending inventory level is compared to the Agricultural Statistics Board estimate for reasonableness.

Revision Policy: Revisions to previous estimates are made to improve quarter to quarter relationships. Estimates for the previous quarter are subject to revision when current estimates are made. In June, estimates for the previous March and December are reviewed and in December, estimates for all quarters of the previous two years are reviewed. The reviews are primarily based on hog check-off receipts and hog slaughter. Estimates will also be reviewed after data from the Department of Commerce's five-year Census of Agriculture are available. No revisions will be made after that date.

Reliability: Since all operations raising hogs are not included in the sample, survey estimates are subject to sampling variability. Survey results are also subject to non-sampling errors such as omissions, duplications, and mistakes in reporting, recording, and processing the data. The effects of these errors cannot be measured directly. They are minimized through rigid quality controls in the data collection process and through a careful review of all reported data for consistency and reasonableness.

To assist users in evaluating the reliability of the estimates in this report, the "Root Mean Square Error" is shown for selected items in the table below. The "Root Mean Square Error" is a statistical measure based on past performance and is computed using the differences between first and final estimates. The "Root Mean Square Error" for hog inventory estimates over the past 16 quarters is 0.9 percent. This means that chances are 2 out of 3 that the final estimate will not be above or below the current estimate of 59.3 million head by more than 0.9 percent, or about 533,000 head. Chances are 9 out of 10 that the difference will not exceed 1.6 percent, or about 948,000 head (the 90 percent confidence level).

Reliability of June 1 Hog Estimates 1/

Item	Root Mean Square Error	90% Confidence Level	Difference Between First and Final Estimates <u>2/</u>				Number of Quarters	
			Average	Smallest	Largest	First Above Final	First Below Final	
	-	Percent -	----- 1,000 Head -----				-	Number -
All Hogs & Pigs	0.9	1.6	948	-45	20	-1130	9	7
Pig Crop	1.3	2.3	625	64	17	-562	6	10
Expected Farrowings								
Next Quarter	3.2	5.6	176	-0	-8	164	10	6
Following Quarter	4.0	7.1	216	12	-2	214	9	7

1/ Based on quarterly data from June 1988 through March 1992.

2/ Records for the past 12 quarters.
